

# Carbon Reduction Plan (PPN 06/21)

Supplier name: JD2E Ltd

Publication date: January 2026

## Commitment to achieving Net Zero

JD2E Ltd is committed to aiming to achieve Net Zero emissions by 2050.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

<b>Baseline Year:</b> 2021					
<b>Additional Details relating to the Baseline Emissions calculations.</b>					
Our baseline and current year are the same as no data was previously available.					
<b>Baseline year emissions:</b>					
EMISSIONS	TOTAL (tCO <sub>2</sub> e)				
Scope 1	0.19 (source Company Car)				
Scope 2	Electricity & Gas out of Scope as leased building				
Scope 3 (Included Sources)	Scope 3 emissions breakdown covers: <table border="1"><tr><td>Employee Commutes</td><td>22.13</td></tr><tr><td>Business Travel</td><td>Not Measured</td></tr></table>	Employee Commutes	22.13	Business Travel	Not Measured
Employee Commutes	22.13				
Business Travel	Not Measured				
<b>Total Emissions</b>	22.32				

Version Number: 1.4

Document No: QUAL-40

Dated: 19<sup>th</sup> January 2026

## Current Emissions Reporting

Reporting Year: 2025					
EMISSIONS	TOTAL (tCO <sub>2</sub> e)				
Scope 1	3.8 (source Company Car)				
Scope 2	Electricity & Gas out of Scope as leased building				
Scope 3 (Included Sources)	Scope 3 emissions breakdown covers: <table border="1"><tr><td>Employee Commutes</td><td>13.63</td></tr><tr><td>Business Travel</td><td>7.35</td></tr></table>	Employee Commutes	13.63	Business Travel	7.35
Employee Commutes	13.63				
Business Travel	7.35				
Total Emissions	24.78				

## Emissions reduction targets

To continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 16.75 tCO<sub>2</sub>e by 2027. This is a reduction of 25%.

Our Scope 3 Business Travel was not measured for the Baseline Year as the data did not exist in a reportable format. Our emissions have increased this year but are in line with our reduction targets, our business travel increased due to the creation of a new BD role which due to the nature of the position involves a considerable amount of travel, public transport choices have and are being utilised as opposed to vehicle travel where possible. A continued growth of the company has resulted in an increase to our Employee Commute data.

Our Scope 2 Electricity & Gas are out of scope as we are in a leased building with no control over the supply to the building, in future as we are able to measure these we will report accordingly. Again this may raise our current emissions.

Progress against these targets can be seen in the graph below:

The graph below demonstrates that whilst JD2E Ltd is still increasing in numbers of staff, thus reflecting an increase in overall emissions, our tCO2e per employee is decreasing compared to our baseline year:

## Carbon Reduction Projects

Version Number: 1.4  
Document No: QUAL-40  
Dated: 19<sup>th</sup> January 2026

## Completed Carbon Reduction Initiatives

JD2E Ltd allows employees the ability to work from home, where applicable and appropriate, to reduce Scope 3 emissions.

Use of technology for virtual meetings is always considered before business travel plans are made.

In the future we hope to implement further measures such as:

- Replacing business vehicles with electric models.
- In conjunction with other leasees, work with the owners of the leased buildings, to discuss and implement use of green suppliers of energy.

## Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>1</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>2</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard<sup>3</sup>.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
